Financial State of Minneapolis

Minneapolis' financial condition worsened by \$404.4 million, resulting in a Taxpayer Burden™ of \$2,800, earning a “C” grade from Truth in Accounting.

According to the city's 2022 financial report, the city continued to spend federal COVID-19 relief funds, and as the U.S. economy reopened, the city took in additional tax revenue. Such economic gains were offset by increases in the city's pension liability. Over the past few years, investment market values have swung dramatically. In 2022, this volatility negatively impacted the city's pension investments and its financial condition, which demonstrates the risk to taxpayers when their city offers defined pension benefits to its employees.

Minneapolis had set aside only 74 cents for every dollar of promised pension benefits and no money set aside for promised retiree health care benefits.

It is important to note that continued market fluctuations, changing investment values, decreased COVID relief funds, and a stabilizing economy that may slow tax collections, could worsen Minneapolis' financial health further. City officials should try to reduce the Taxpayer Burden by following the recommendations in our 2024 Financial State of the Cities report which would bring greater transparency and accountability to city finances.

Minneapolis' Financial Breakdown

Fast Facts

- Minneapolis had \$1.2 billion available to pay \$1.7 billion worth of bills.
- The outcome was a \$439.9 million shortfall, an increase of \$404.4 million from the prior year, and a burden of \$2,800 per taxpayer.
- Minneapolis received COVID-19 relief funds and increased tax collections, but due in part to lower valuations on its pension investments, its unfunded pension promises increased significantly.
