**Financial State of Nevada**

Despite receiving support from COVID relief grants and other federal programs, Nevada’s overall financial condition did not improve during the onset of the pandemic. Based upon the state’s fiscal year 2020 audited financial report, Nevada had a Taxpayer Burden™ of \$2,600, earning it a “C” grade from Truth in Accounting.

Nevada’s elected officials have repeatedly made financial decisions that left the state with a debt burden of \$2.6 billion. That burden came to \$2,600 for every state taxpayer. Nevada’s financial problems stem mostly from unfunded retirement obligations that have over the years. The state had only set aside 77 cents for every dollar of promised pension benefits and has set aside no money for promised retiree health care benefits.

Nevada did not have enough money set aside to weather the pandemic. Like all other states, Nevada received federal assistance from the CARES Act and other COVID-19 related grants which came with stipulations on how the money could be spent. However, the state is in poor fiscal health because it has not been properly funding its pension and retiree health care promises which places a burden on future taxpayers.

The data included in this report is derived from the state of Nevada’s 2020 audited Annual Comprehensive Financial Report and retirement plans’ reports. To compare states’ financial information go to [Data-Z.org](http://Data-Z.org).
