

## NORTH DAKOTA IS IN THE SECOND BEST FINANCIAL POSITION OF ALL 50 STATES

North Dakota has \$11.3 billion worth of assets, but most of these assets are not available to meet the state's obligations. More than \$2.5 billion of these assets are infrastructure like roads, bridges and parks, which cannot realistically be used to pay bills. The use of \$2.6 billion of the assets is also restricted by law or contract. The state has \$6.2 billion in assets available to pay \$4.7 billion of bills as they come due. This leaves Wyoming with more than \$1.5 billion after its bills are paid.

Unlike most states, North Dakota has the money to pay the state employees' retirement benefits and other costs. North Dakota is in good financial shape because the legislators and governors have only promised citizens what they can afford to deliver.

During these tough economic times, citizens need to be vigilant to make sure legislators do not use budgeting gimmicks that have put other states in financial crisis. These tricks include: borrowing money to pay current bills, charging current bills to the state's "credit card" by delaying payment, and hiding current payroll costs by offering state employees benefits without providing adequate funding.

**Citizens need to demand their state legislators use Truth in Accounting.**
