WHAT IS PHOENIX HIDING?

$3.7 BILLION IN HIDDEN RETIREMENT DEBT

$1.8 BILLION NEEDED TO PAY BILLS

$4,500 TAXPAYER BURDEN
Phoenix has $16.8 billion in assets, but most of these assets are not available to pay city bills.

The $12 billion of capital assets, such as roads, buildings, and land should not be sold to pay bills. The use of $1.3 billion of the assets is restricted by law or contract.

That leaves $3.5 billion of city's assets available to pay $5.3 billion of bills as they come due.

The -$1.8 billion shortfall represents compensation and other costs incurred in prior years that should have been paid in those prior years. Instead these costs have been shifted to future taxpayers.

Each Taxpayer's Share of Phoenix's Debt:
-$4,500

Despite the balanced budget requirement, the city has accumulated bonds of $6.9 billion and other liabilities of $1.3 billion. The calculation of assets available to pay bills does not include capital assets, so $6.7 billion of related debt is removed from the calculation of city bills.

Unfunded employees' retirement benefits represent 70% of city bills. These unfunded liabilities have accumulated because city employees have been promised $3.4 billion of pension benefits and $290.6 million of retirees' health care benefits, but the city has not adequately funded them.

Unless these pension and retirees' health care benefits are renegotiated, future taxpayers will be burdened with paying for these benefits without receiving any corresponding government services or benefits.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable and transparent government financial information.

We call on governments to truthfully balance their budgets by including all real and certain expenses when incurred not when paid.

To be knowledgeable participants in their government and its budget process, citizens need to be provided with truthful and transparent financial information.
