## Financial State of Albuquerque

Albuquerque's financial condition worsened by \$77.3 million, resulting in a Taxpayer Burden™ of \$3,900 and earning it a "C" grade from Truth in Accounting.

According to the city's 2022 financial report, the city continued to spend federal COVID-19 relief funds, and as the U.S. economy reopened, the city took in additional tax revenue. Such economic gains were offset by increases in the city's pension liability. Over the past few years, investment market values have swung dramatically. In 2022, this volatility negatively impacted the city's pension investments and its financial condition, which demonstrates the risk to taxpayers when their city offers defined pension benefits to its employees.

Albuquerque had set aside only 70 cents for every dollar of promised pension benefits and only 30 cents for every dollar of promised retiree health care benefits.

It is important to note that continued market fluctuations, changing investment values, decreased COVID relief funds, and a stabilizing economy that may slow tax collections, could worsen Albuquerque's financial condition further. City officials should try to reduce the Taxpayer Burden by following the recommendations in our 2024 Financial State of the Cities report which would bring greater transparency and accountability to city finances.

# Albuquerque's Financial Breakdown

## Fast Facts

- Albuquerque had \$1.1 billion available to pay \$1.7 billion worth of bills.
- The outcome was a \$628.4 million shortfall, an increase of \$77.3 million from the prior year, and a burden of \$3,900 per taxpayer.
- While the city had a \$20 million increase in revenue and spent COVID-related funds, the city's unfunded pension benefits increased significantly due to weak returns on its pension investments.
