

CHICAGO TAXPAYERS OWE \$28,600 EACH

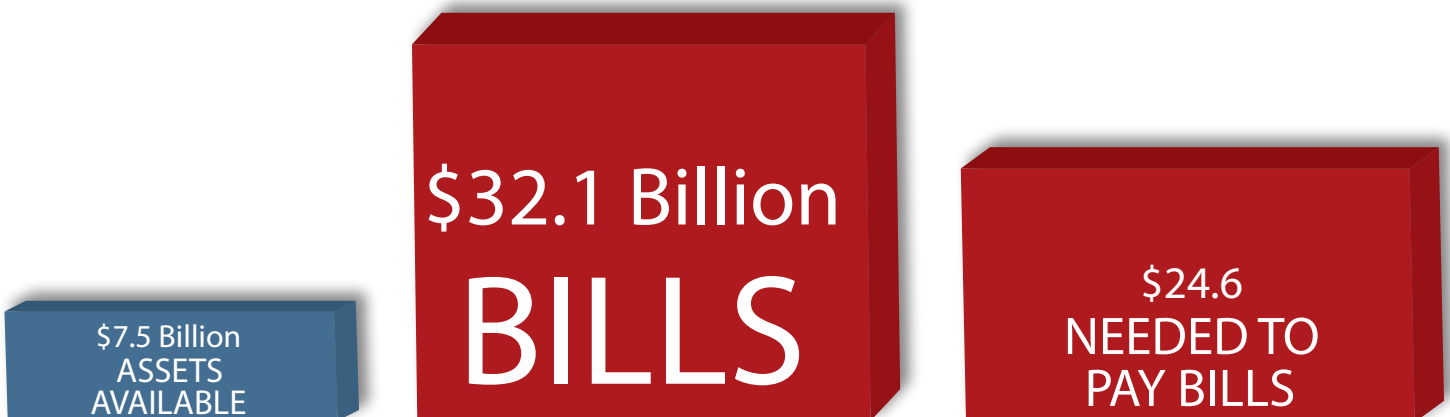

Chicago is sinking in debt. This gaping financial hole is a result of Chicago's unreported \$12 billion retirement obligations, which were hidden from the city's balance sheet due to outdated accounting practices.

Truth in Accounting's detailed analysis discovered a total of \$21 billion of retirement benefits are owed, but not funded. Because of the confusing way the city does its accounting, only \$9 billion of these liabilities are reported on Chicago's balance sheet. If this debt is included, Chicago has a \$24 billion shortfall, which effectively represents compensation and other costs that have been pushed into the future.

If Chicago's \$24 billion shortfall were divided amongst its taxpayers, each taxpayer's personal share would be \$28,200.

CHICAGO'S BILLS EXCEED ITS ASSETS

THE FINANCIAL STATE OF CHICAGO

The City's Bills Exceed Its Assets

Assets	\$32,092,300,000
Less: Capital Assets	\$22,103,660,000
Restricted Assets	\$2,470,967,000
Assets Available to Pay Bills	\$7,517,673,000
Less: Bills	\$32,086,675,000
Money Needed to Pay Bills	\$24,569,002,000
Each Taxpayer's Share of Debt	\$28,600

Chicago has \$32.1 billion in assets, but most of these assets are not available to pay city bills.

The \$22.1 billion of capital assets, such as roads, buildings, and land should not be sold to pay bills. The use of \$2.5 billion of the assets is restricted by law or contract.

That leaves \$7.5 billion of city's assets available to pay \$32.1 billion of bills as they come due.

The \$24.6 billion shortfall represents compensation and other costs incurred in prior years that should have been paid in those prior years. Instead these costs have been shifted to future taxpayers.

Each Taxpayer's share of the city's debt is \$28,600.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable and transparent government financial information.

We call on governments to truthfully balance their budgets by including all real and certain expenses when incurred not when paid.

To be knowledgeable participants in their government and its budget process, citizens need to be provided with truthful and transparent financial information.

The Bills Chicago Has Accumulated

Bonds	\$23,209,074,000
Other Liabilities	\$7,137,631,000
Less: Debt Related to Capital Assets	\$19,361,091,000
Unfunded Pension Benefits	\$20,090,590,000
Unfunded Retirees' Health Care Benefits	\$1,010,471,000
Bills	\$32,086,675,000

Despite the balanced budget requirement, the city has accumulated bonds of \$23.2 billion and other liabilities of \$7.1 billion. The calculation of assets available to pay bills does not include capital assets, so \$19.4 billion of related debt is removed from the calculation of city bills.

Unfunded employees' retirement benefits represent 66% of city bills. These unfunded liabilities have accumulated because city employees have been promised \$20.1 billion of pension benefits and \$1 billion of retirees' health care benefits, but the city has not adequately funded them.

Unless these pension and retirees' health care benefits are renegotiated, future taxpayers will be burdened with paying for these benefits without receiving any corresponding government services or benefits.

Not All Retirement Liabilities Are Clearly Disclosed

A detailed study of Chicago's actuaries' schedules found retirement benefits totaling \$21.1 billion have been promised, but not funded. A review of the city's balance sheet determined only \$8.9 billion of these liabilities are reported. This means the city does not report \$12.2 billion of retirement liabilities on its balance sheet.

Data is derived from the city of Chicago's December 31, 2014 audited Comprehensive Annual Financial Report and retirement plans' actuarial reports.

Number of taxpayers is based on an estimation of the city's population with a federal tax liability.
