THE FINANCIAL STATE OF ILLINOIS

A new analysis of the latest available comprehensive annual financial report found Illinois had a Taxpayer Burden™ of \$50,800, earning it an "F" grade based on Truth in Accounting's grading scale.

Financial decisions made by the state's elected officials over the years have left Illinois with a \$216.1 billion shortfall, which equates to \$50,800 for every taxpayer. Most of the state's overall debt comes from constitutionally-protected pension benefits and retiree health care costs. Of the \$270.6 billion of retirement benefits promised, the state has not funded \$134.4 billion of pension benefits and \$52.5 billion of retiree health care benefits.

Illinois' financial condition is not only concerning, but also misleading as government officials have failed to disclose significant amounts of retirement debt on the state's balance sheet. As a result, residents and taxpayers have been presented with an inaccurate and untruthful accounting of the state government's finances.

ILLINOIS FINANCIAL BREAKDOWN

FAST FACTS

- + Illinois has \$28.8 billion available in assets to pay \$244.9 billion worth of bills.
- + The outcome: A \$216.1 billion shortfall and a \$50,800 Taxpayer Burden.
- + Despite reporting all of its pension debt, the state continues to hide \$36.1 billion of its retiree health care debt.
- + Illinois' reported net position is inflated by \$24.4 billion, largely because it has delayed recognizing changes to its net pension liability.
