### Financial State of Indianapolis, Indiana

This report shows that Indianapolis went into the coronavirus pandemic in mediocre fiscal health, and it will probably come out of the crisis worse. Based upon the city’s fiscal year 2019 audited financial report, Indianapolis had a Taxpayer Burden™ of \$3,900, earning it a “C” grade from Truth in Accounting.

Indianapolis’s elected officials have repeatedly made financial decisions that have left the city with a debt burden of \$1.1 billion. That burden equates to \$3,900 for every city taxpayer. Indianapolis’s financial problems stem mostly from unfunded retirement obligations that have accumulated over the years. Of the \$2.7 billion in retirement benefits promised, the city has not funded \$870 million in pension and \$231.2 million in retiree health care benefits.

Indianapolis did not have enough money set aside to weather the current pandemic and fluctuations in the market. The city is expected to lose some revenue as a result of the pandemic. The uncertainty surrounding this crisis makes it impossible to determine how much will be needed to maintain government services and benefits, but Indianapolis’s overall debt will most likely increase.

The data included in this report is derived from the city of Indianapolis’s 2019 audited Comprehensive Annual Financial Report and retirement plans’ reports. To compare cities’ financial information go to [data-z.org](http://data-z.org).
