

MILWAUKEE FINANCES STRUGGLING

January 2018 truthinaccounting.org

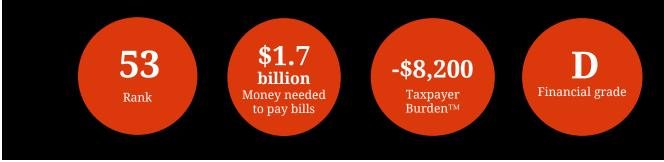

THE FINANCIAL STATE OF MILWAUKEE

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Milwaukee ranks No. 53, earning it a "D" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$1.7 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$8,200 for every Milwaukee taxpayer.

Milwaukee's financial problems are largely driven by long-term debt and runaway entitlement obligations in the form of retiree healthcare benefits. The city has \$354 million in unfunded pension promises and \$1 billion in unfunded retiree healthcare benefits. While Milwaukee has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

Data included in this report is derived from the city of Milwaukee's 2016 audited Comprehensive Annual Financial Report and retirement plans' actuarial reports. Visit statedatalab.org for more information.
