

THE FINANCIAL STATE OF WISCONSIN

Repeated decisions by state officials have left the state with a staggering debt burden of \$8.8 billion, according to Truth in Accounting's (TIA) analysis of the most recent financial filings. That burden equates to \$4,400 for every Wisconsin taxpayer.

These statistics are troubling, but what's more troubling is that state government officials continue to obscure large amounts of retirement debt on their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives state residents a false impression of their state's overall financial health.
